UK Companies Interested in Doing Business with the UN

2015 Edition

This directory lists companies with UK offices that have expressed interest in working with the UN in New York. It has been prepared by UKTI New York for the sole purpose of enabling companies to connect.

Please refer to disclaimer below before consulting this document

This document is not connected to nor maintained by the UN.
Information on registering with the UN procurement portal, UN Global Marketplace can be found at www.UNGM.org

To include your company in the directory or to request changes to existing company entries, please contact:

Brian Chang
Brian.Chang@fco.gov.uk

Ben Brierley
Ben.Brierley@fco.gov.uk

Please note that as a UK government agency, UK Trade & Investment (UKTI) does not recommend or endorse any particular organisation listed in this directory. Rather, the information provided here is for general informational purposes only. Whereas every effort has been made to ensure that the information provided in the directory is accurate, UKTI accepts no liability for any errors, omissions or misleading statements in such information, and accepts no responsibility as to the standing of any firm, company or individual mentioned. Any party interested in the goods or services provided by any company referred to in this directory should undertake their own research and should not consider a reference in this directory to be an endorsement of any goods, services or companies mentioned.

Companies

Adaptive Eyewear Ltd

Contact: Sebastian Ford
Telephone Number: +44 (0) 7859 077 333
Contact Email: sebastian.ford@adaptive-eyewear.org
Website: www.adaptive-eyewear.org
Sector(s): Healthcare and Medical
Registered on UNGM: Yes

Adaptive Eyewear is a UK-based social enterprise that supplies adjustable glasses to humanitarian and development organisations. Millions of people around the world lack access to affordable glasses. Adaptive Eyewear has a simple solution: adjustable glasses that focus at the turn of a dial. The glasses provide an affordable, high quality vision correction solution for populations without access to eye care services. Adaptive Eyewear works with organisations to get glasses to those who need them most, wherever they are. To support this mission, Adaptive Eyewear can provide technical support and a range of materials to enable organisations to conduct vision assessments and dispense glasses.

Air Charter Service Plc

Contact: Dan Morgan-Evans
Telephone Number: +44 208 339 8555
Contact Email: un@aircharter.co.uk
Website: www.aircharterservice.com
Sector(s): Aerospace, Aircraft Charter Broker
UNSPSC Code(s): 78101500, 78111501, 78111502, 78111503
Registered on UNGM: Yes

Air Charter Service (ACS) is a leading global aircraft charter company with offices in Almaty, Beijing, Dubai, Frankfurt, Hong Kong, Houston, Johannesburg, London, Los Angeles, Madrid, Moscow, Mumbai, New York, Paris, Sao Paulo, St Petersburg, Tokyo and Toronto. ACS was founded in 1990 and has grown organically to its current market position. ACS now arranges over 7,500 full charter contracts per year across its 3 divisions; cargo, executive jets and commercial airliners, creating annual revenues approaching \$500 million.

ACS differs from any of its competitors by providing its clients with the highest customer service levels in the industry. This has been the foundation that the business has been built upon. ACS is available to fulfil any charter requirements 24/7, 365 days a year.

Airfloat Ltd

Contact: Patrick Connon
Telephone Number: +44(0)1892784823
Contact Email: info@airfloatmps.com
Website: www.airfloatmps.com
Sector(s): Environment and Water, Ports and Logistics, Marine
Registered on UNGM: Yes

Modular Pontoon Systems easy to install Long lasting, environmentally friendly, robust, ideal for disaster relief and all temporary bridges, docks, and walkways made from MDPE, rotationally moulded, and made to ISO 9001.

AirTanker Ltd

Contact: Simon Kershaw
Telephone Number: +44 203 178 7366 and +44 7827 882868
Contact Email: leasing@airtanker.co.uk
Website: www.airtanker.co.uk
Sector(s): Aerospace, Defence and Security
UNSPSC Code(s): 78111502, 78111503
Registered on UNGM: Yes

AirTanker offers passenger, freight and aeromedical charter using our fleet of Airbus A330-200 aircraft. AirTanker holds its own Air Operators certificate, and offers a full CAA Part M and Part 145 approved engineering and maintenance service. Flying on the UK Civil Aircraft Register with our own flight and cabin crew, we can provide a 291 passenger capability in a single economy class, with 34 inch pitch (legroom) and in-flight entertainment. Aircraft could be available for short term (single or dual sector) or longer term charter depending on user requirements. The aircraft is capable of carrying 43 tonnes of freight with an automated handling system for civilian or military (NATO) cargo containers located below deck. The passenger cabin can be configured to

provide a 40 bed aeromedical evacuation capability including 3 critical care patient facilities.

Appointed in 2008 to deliver air transport and air to air refuelling services to the Royal Air Force (RAF) under a 27 year contract, we have extensive experience in support of rapid reaction and short notice contracts. Under the terms of our agreement with the UK Ministry of Defence, AirTanker owns and operates a fleet of 14 Airbus A330-200 multi-role tanker-transport (MRTT) aircraft, 9 of which are permanently available to the RAF. When not required by the RAF, Air Tanker is able to lease the remaining 5 aircraft to the civilian market, with military equipment removed, for charter by 3rd party users.

Members of the AirTanker business include leading aerospace and defence specialists Airbus Group, Thales, Rolls-Royce, Cobham and Babcock.

Albion International Ltd

Contact: Yasmin Watson

Telephone Number: 01292 610428

Website: <http://www.albionenvironmentalinternational.com/>

Sectors: Agriculture, Training, Energy, Environment & Water, Training, Healthcare

Albion international Ltd (AEI) is a UK based company who provide expertise Waste and Resource Management services with a key focus to grow in developing and emerging markets.

We have evolved from our sister company Albion Environmental Ltd, one of the UK's leading specialists in waste management and consultancy, environmental, health and safety solutions. Since its establishment in 2002, Albion Environmental has delivered professional strategic advice, support and training to the waste management and construction industries in both the public and private sectors.

To raise the company profile internationally and better understand the market place we are working with and liaising with a number of organisations including:

- UKTI Aid-Funded Business Service
- Scottish Enterprise
- Scottish Development International
- Department for International Development (DFID)

Opportunities exist for AEI to enter into joint ventures with partners both UK and European based, and also to provide sub contracted services on larger projects. AEI can provide key training and consultancy services across a wide range of international public sector agencies and major private commercial companies.

We have already carried out projects in Eastern Europe and Africa and it is clear from this experience that there is a huge opportunity and demand for these services. AEI has a proven track record of delivering projects which achieve very high recycling rates, improvements in public health and health and safety awareness and employment and earning opportunities.

At AEI we focus on solutions for the customer, rather than delivering reports and endless analysis. We have access to a network of highly qualified and experienced professionals coupled with a variety of experienced partners and sub-contractors to carry out our work worldwide. Our fundamental business strategy is to build and maintain long term client relationships by ensuring their needs are understood and delivered in the best possible way.

Armfield Ltd

Contact: Charlie Hayward

Telephone Number: 44 (0) 1425 478781

Contact Email: sales@armfield.co.uk

Website: www.armfield.co.uk

Sector(s): Education, Engineering Teaching Equipment, Food and Drink, Dairy, Edible Oils, Pharmaceuticals & R&D

UNSPSC Code(s): 86141700, 23180000

Registered on UNGM: No

Armfield can trace its history back over 130 years, throughout which the Company has maintained a strong market share and developed a reputation for industrial leadership. Armfield's business is divided between two distinct sectors: Engineering Education and Industrial Research and Development. The Armfield Engineering Education Division designs and manufactures equipment for engineering education and research. Used at universities, colleges, schools and research centres around the world, Armfield equipment is known for innovative designs and a level of quality unmatched in the industry. The Armfield range covers all of the main engineering disciplines, and is constantly evolving in line with the growing demands of engineering education. The Education Division has been serving the needs of engineering education for over 50 years and has supplied equipment in over 100 countries and has a subsidiary operation in the USA. The Armfield Industrial Division designs and manufactures miniature-scale research and development systems for the food, beverage, dairy, oils and pharmaceutical industries. The equipment has been designed to replicate manufacturing processes on a miniature scale, which enables research and development teams to test new product formulations quickly and easily. Running multiple cost-effective trials in a controlled laboratory environment using Armfield equipment saves time, saves energy, uses fewer raw materials and also produces less waste. All these factors result in saving space, time, and money; this also helps to look after the environment at the same time. Armfield's extensive client list features many of the world's biggest food and beverage brands. Armfield are an ISO 9001:2008 accredited company and their products are manufactured to meet stringent CE standards. Formal quality control procedures are applied at every stage of order, processing & design origination.

Armtrac Ltd

Contact: Steve Brown

Telephone Number: +44 (0)1638 743979

Contact Email: steve@armtrac.net

Website: www.armtrac.net

Sector(s): Advanced Engineering, Automotive, Construction, Defence and Security, Robotics, Manufacture of Mechanical Demining & C-IED equipment

Registered on UNGM: Yes

Armtrac Ltd, based in Cambridgeshire UK, manufactures quality, safe and value for money mechanical equipment to counter the threat from Explosive Ordnance (EO) including landmines, Improvised Explosive Devices (IEDs) and Booby Traps. As an ISO 9001 company, Armtrac provides quality mechanical solutions using remote controlled technology and on some of the larger machines, an operator's cabin to provide a "bird's eye" view of clearance operations. All equipments use hydraulic quick hitch couplings to attach a variety of toolkits to the front or rear of the machine. This allows all Armtrac equipment to not only destroy EO in situ but also to sort, sift and mitigate the effects of EO & operate in secondary construction and engineering roles beyond their primary functions. Therefore Armtrac products are particularly versatile and have a second life both in and out of high threat areas. The company prides itself on producing innovative solutions to a variety of different threats and can design and manufacture for bespoke requirements.

The Armtrac 20T Robot is the newest of its products. It is a remote controlled Small (Heavy) Unmanned Ground Vehicle designed to undertake high risk investigation and De-mining/C-IED clearance operations. This robust and flexible robot is fitted with a diesel engine that can operate for several hours without refuelling and can therefore support lengthy De-mining/C-IED operations. The Robot can be fitted with surface and sub-surface EO disposal equipment, real time X-Ray and other detection systems (including Ground Probing Radar) and an advanced manipulator for investigating and analysing the threat. Remote operations are supported by real time cameras and monitors. There are a number of sub-surface impact and engineering tools available with the Armtrac 20T including a Flail, Manipulator Arm, Minecomb and front loading Bucket/Fork Lift.

Aspen Solutions Ltd

Contact: Colleen Rae

Registered on UNGM: Yes

Aviation Spares & Repairs (ASR) is a specialist aviation supply contractor with extensive experience in the supply of spares and systems for aircraft and airport support activities. We have a proven track record in the prompt and cost effective supply of high quality products and services for a range of aircraft and power plants.

We also supply a broad range of Ground Support Equipment including a full range of aircraft tow tractors and tow bars and ramp equipment (ground power units, oxygen and nitrogen carts, lavatory and water carts, aircraft jacks, electric utility vehicles, stairs/stands, ramp chocks, marshalling wands, wing mats etc.). We are exclusive resellers in the UK and Europe for Eagle Tugs and in the UK aviation sector for Goupil Industrie. We are also the exclusive resellers of Aero Specialties JetGo range of GPU's in the UK, Europe and the GCC.

ASR has a global client base that includes ongoing associations with commercial, military and other government organisations, we recognise that the paramount requirement for customers is to ensure all aircraft are operational and mission capable, whilst working within the strict controls of a meticulous safety program.

Avon Protection

Contact: Julia Daniell
Telephone Number: +44 (0) 1255 896564
Contact Email: Julia.daniell@avon-protection.com
Website: www.avon-protection.com
Sector(s): Defence and Security
Registered on UNGM: No

Avon Protection is the recognised Global Market Leader in respiratory protection system technology offering innovative Personal Protective Equipment (PPE) products and services to the military, law enforcement, emergency services, firefighting and industrial sectors.

Avon Protection is the primary supplier of CBRN PPE to the United States Department of Defense and is trusted globally. Avon Protection is one of several businesses operated by Avon Rubber p.l.c., a global engineering and design group established 1885. With an unrivalled pedigree in mask design dating back to the 1920's, Avon Protection's advanced respiratory products are selected for their superior comfort and quality. The first choice for many PPE users worldwide.

The respiratory protection company is a total solutions provider manufacturing a broad portfolio of innovative high-performance and timesaving respiratory PPE including full face masks, self-contained breathing apparatus, supplied air, powered air, particulate and air-purifying respirators, escape devices, escape hoods, filters for riot control and CBRN protection and complimentary accessories.

In addition to providing innovative respiratory PPE, Avon Protection offers a bespoke series of training programmes to provide existing or potential Avon customers, such as military or law enforcement task forces, with the knowledge and expertise to use and maintain their Avon Protection equipment correctly, thereby improving lifetime and performance.

Avon Protection's total solution product ranges provide significant opportunity for growth into new markets. Avon Protection Underwater Systems launched in 2013 providing the opportunity to offer advanced rebreather technology to the military market. The market leader now offers products for land, air and water and is trusted worldwide to keep troops safe.

Blackthorne International Transport Ltd

Contact: Charles Swain

Telephone Number: +44(0)1753 687848

Contact Email: charles@blackthornetransport.co.uk

Website: www.blackthornetransport.co.uk

Registered on UNGM: Yes

We deliver both personnel and material utilising a mix of aviation and maritime capability, complimented by traditional freight forwarding, logistics and project services. Safely deploying, sustaining, and retrieving our clients' staff and equipment in austere and often hostile environments.

Our activities encompass core competence in all logistics disciplines. Simply shifting freight is the task of any broker or forwarder but C2's long experience in complex multi-disciplined projects in diverse and particularly challenging areas of the world enables us to bring an additional element into project planning. Our expert staff have hands-on experience on-site in a range of non-benign conditions and understand the particular requirements needed to mitigate the range of problems and risks faced.

We are adept at balancing security, cultural, political, legal and licensing complexities for the transport of security sensitive, and hazardous and high value cargoes to and through those areas of the world where simple solutions have failed.

Our capability and expertise includes:

- Transport and delivery
- Maritime Operations and Charter
- Aviation Operations and Charter
- UAVs and Precision Aerial Delivery Systems

- Procurement and supply
- Construction and Facilities Management
- Training and consulting
- Specialist support

C2 Logistics has over 20 years of proven performance in supporting emergency and exploration logistics & supply chain across 6 continents and for a wide range of international clients, including governments, commercial organisations, NGOs, the EU, NATO & the UN.

Callen - Lenz is an aviation operator, developer, manufacturer and consultancy specialising in aircraft test and evaluation (T&E) and in unmanned aviation. Our technical consultancy spans the aviation sector and we have operational capability in the manned and unmanned domains.

Our staff are drawn extensively from civil and military test and evaluation backgrounds in Rotary Wing, Fast Jet and Unmanned Aircraft development and operation. In the unmanned sector Callen - Lenz holds a UK Civil Aviation Authority Operating Permission for national operations and delivers services across the UK. We conduct unmanned aircraft operations in all airspace and have the UK's widest civil operating envelope. We provide remote sensing and monitoring to both public companies and government departments for agriculture, forestry and environmental applications.

We conduct manned and unmanned aircraft trials and research operations for both private and government customers and conduct helicopter flight operations to ICAO standards. We are also developers and manufacturers of the Sky Circuits autopilot and unmanned avionics products, which represent one of the most flexible autopilot capabilities available worldwide.

Our experience spans the technical development life cycle from requirements capture, through development test, operational test and to front line operational deployment from the piloting, engineering and support perspectives. With a comprehensive understanding of the T&E business and independent test and evaluation, the company provides technical solutions to customers in the UK and overseas.

UNSPSC Code(s): 25130000, 25131500, 78100000, 78101500, 78101700, 78101800, 78101801, 78101802, 78101900, 78111800, 78120000, 78141501, 78141800, 80161602, 81141600, 86101700, 86101800

Registered on UNGM: Yes

Cargo Link Express (CLE) is a niche integrated logistics solutions provider that has been in operation since 2003. Its headquarters is at East Midlands Airport in the UK and it has offices in the USA, Central and South America, continental Europe, the Middle East, Africa, the Indian sub-continent and the Asia-Pacific region to support its freight-focused operations.

CLE's independence and flexibility allows selection of the most appropriate logistic or transport solution - based on commodity type, volume, scheduling, previous performance, customs status and security requirements - providing customers with significant cost-effectiveness. We provide robust and open communication in order to build strong relationships with our clients and sub-contractors.

CLE has a diverse range of customers that include government, military forces, defence and security contractors as well as aerospace and the manufacturing industry.

Clip-Lok SimPak (GBE) UK Ltd

Contact: James Milne

Telephone Number: +44 (0) 1684 560222

Contact Email: jmilne@clip-lok.com

Website: www.clip-lok.co.uk

Sector(s): Packaging

For more than 25 years, Clip-Lok SimPak has been building reusable, flat-packable boxes which meet the demands of industries such as defence, automotive, high-tech and aeronautics. In addition to strength and flexibility, Clip-Lok boxes provide superior savings. A Clip-Lok box is typically reused over 100 times, but investment payback is often seen after only three shipments.

Conidia Bioscience Ltd

Registered on UNGM: Yes

A veteran-owned UK company, Crewshield designs and manufactures portable ballistic structures based on the ISO 20' container system. Our units offer a rapidly deployable, turnkey safe room capability for land or maritime use and can be configured in a number of ways to suit client requirements. Having spent two years in R&D, we launched the system within the UK in April 2013.

Crewshield's 20' high capacity/high endurance citadel variant is ballistic resistant to BR6 and 7.62*39mm API as standard. This ballistic protection can be enhanced further with the use of other material and defensive strategies, blast protection can also easily be intergrated into the design if required.

It also comes with a range of communication options and has external covert CCTV, with internal VCR and VDU. This enables live feed of the external situation to be fed through to rescuers, enabling external forces to act more efficiently, as staff are secure inside.

Capable of immediate operation in temperatures as high as 55oC and 100% humidity, each unit has capacity for 24 persons and up to 96 hours completely independent operation after the loss of external power.

As the Product is based on the ISO 20" container system and weighs just over 10 tonnes, it is easily transportable, whether by road, rail, sea or air.

Remarkably, despite the deep and extensive innovation of this Product, it compares extremely favourably, cost wise, to other traditional safe room options and can broadly be compared to a B6 armoured land cruiser in terms of initial cost.

This extremely flexible system has been adopted by UK DFID for use on land and is currently deployed in West Africa to counter Boko Haram. It is also being used by an International Oil Firm, to counter ISIS in Iraq.

We are an international development company that partners with governments, aid organisations and companies in over 100 countries.

Through consultancy, supply chain management and financial services, we help countries grow their economies, strengthen their health systems and improve financial management, bringing an agile and resourceful approach to complex development issues.

Taking on clients' fundamental challenges, we make lasting change to the systems and organisations that are vital for people's well-being and prosperity. We have worked with many of our client countries for many decades and are a stakeholder in their growth and development, with people and offices in Africa and Asia as well as the UK, US and Japan.

Governance and State Building

We work with countries to transform their public financial management systems. Our experts contribute to improving public sector management and accountability, and also focus on conflict stabilisation and recovery.

Economic Growth and Trade

Our expertise in economic growth and trade includes private sector development, trade facilitation and food security and livelihoods. We work with a range of national authorities to help them all contribute to building prosperity.

Health Systems Strengthening

We support to health service delivery and improve health supply chain management and logistics, addressing the processes and issues presented by the development of a successful health system.

Supply Chain Services

We help our clients develop a strategic approach to supply chain management, from quantification to last-mile logistics and payments to capacity building & training. We look beyond individual transactions to build sustainable systems that support development programmes.

Financial Services

We work with emerging and fragile markets and currencies, offering tailored, practical and effective solutions built on deep local knowledge and experience of complex environments.

We are the leading tarpaulin cover manufacturer in the UK. We will make your cover specifically for you, to your measurements to suit your purpose. We have been successfully making tarpaulin covers for over 40 years for a vast range of purposes in any shape, size, colour and for almost any use.

We design and manufacture any cover for just about anything that requires protection from the elements. From trailers, boats, tractors and trucks, to specialist covers specifically for the oil and gas industry. From advertisement signs, to playground and sports products, our range and experience is continually growing to meet the needs of our clients.

Using the most up-to-date materials and technologically advanced equipment, Cunningham Covers, together with a dedicated workforce and after-sales service, have helped to contribute to the company's growth over the past 40 years

Further to providing you with such an extensive range, we can also make our products unique to your company, strengthening your brand identity, maximising your advertising potential while making your transportation aesthetically pleasing. Our tarpaulins and curtain sides not only come in a range of different colours but they can also be designed to include your company name, logo and details and also graphics to maximise their impact.

Dulas Ltd is one of the leading UK suppliers of high quality solar power solutions to some of the world's most remote locations. Established in 1982, our products have been helping to fuel essential services such as healthcare, water supply and education for developing communities living in off-grid or remote areas around the world. Among many of the pioneering products developed in the early days, was the innovative solar powered vaccine refrigerator, a product we continue to improve and export to thousands of locations worldwide. Over time, Dulas has worked closely with many UN organisations, Governments, charities and the World Health Organisation to develop products that meet stringent Performance, Quality and Safety standards (PQS). We are proud to have WHO PQS accreditation for all our solar powered vaccine refrigerator systems.

We recently launched the next generation in solar refrigeration providing a step change in vaccine storage technology - Dulas Solar Direct Drive refrigerators. These solar refrigeration systems utilise a ground-breaking phase change energy storage solution thus eliminating the need for traditional batteries. Inspired by over three decades of solar refrigerator manufacturing together with feedback from the field, this is a new generation of entirely self-powered solar refrigerators providing solar cold chain to the most remote locations around the world. Alongside this we offer comprehensive solar training, covering installation and maintenance of our entire range of solar refrigeration systems, we also offer ongoing technical support via email, telephone and video conferencing.

Our work developing the very best systems for the global cold chain has helped to bring much needed energy and better standards of living to many communities across the world. We continue to innovate, developing and improving our portfolio of products, taking research from the field and adding to it a cocktail of experience and engineering expertise.

Dunster House

Contact: Carl Dolby

Telephone Number: 01234 272588

Sector(s): Sanitation items

UNSPSC Code(s): 30181500, 30240000, 39112000, 49120000, 49121500, 95131602, 95141600, 95141601, 95141801

Registered on UNGM: Yes

Dunster House Ltd. has been established in the UK retail market since 1994, with sites in Bedfordshire, Lincolnshire, Wiltshire, Kent and seven sister factories in three countries across Europe (Estonia, Hungary and Poland).

At the beginning we only supplied uPVC windows and doors across the country. We started manufacturing the timber garden products (log cabins, summer houses, garden offices, climbing frames, garages, gazebos, sheds) in 2002 with only 35 people working for us.

Since then, in 12 years, the company has increased its workforce, grown its manufacturing and distribution facilities and ventured into a diverse range of products to become a leading garden log cabin and climbing frame manufacturer in Britain. Now there are over 520 members of staff working for Dunster House in the UK and in sister companies in Europe.

Our Export Department is only 2 years old but it is growing rapidly. The trend looks set to continue on this course for 2015 as the company has plans to increase its sales on an international level. We export to many countries across the world like Netherlands, Spain, Dubai, Israel, Norway, Japan or Russia and we are continuously in new negotiations with other international markets.

The company is constantly moving forward and searching for new solutions. That's why we've started working on our humanitarian range. We see a major need, especially in Africa in terms of sanitation, which affects many aspects of people's lives. We are able to address this pressing need, while focusing on designing and manufacturing adequate sanitation for developing countries. Dunster House has got involved in a charity project with three big charity organizations so far - Oxfam, UNICEF and Medair and started selling its sanitation products to countries like South Sudan and Chad.

Registered on UNGM: Yes

Durbin is a specialist medical supply company that sources and distributes pharmaceuticals, medical equipment and consumables to healthcare professionals in over 180 countries.

From small charities to large Non-Governmental Organisations and multilateral agencies, Durbin provides a cost-effective, one-stop shop for humanitarian aid workers involved in small to large healthcare reconstruction projects. Our in-house team of commercial executives, nurses, medical engineers and pharmacists are on call to handle anything from the smallest enquiry to the largest bulk order.

Durbin's warehouse, situated near London's Heathrow airport, houses over £2m worth of essential medical items and our database consists of over 20,000 products. Our location, stock and speed of delivery combine to give us the unique ability to respond to large-scale disasters.

Established over 50 years ago, Durbin has won many awards, including the Exporter/International Business of the Year 2014 and named a 'National Champion' in the European Business Awards.

FAUN TRACKWAY has manufactured portable roadways and temporary runway systems for over 40 years, and in this time our products have never been beaten. Relied upon by disaster response teams and first responders forces worldwide, each of our products can be deployed in minutes, using the minimum amount of manpower.

The roadways range includes medium and heavy weight portable roadways with rapid deployment and recovery systems, effective in extremes of terrain. The aviation range boasts capability in Helicopter Landing Pads - which are versatile and deployed with ease. Following a natural disaster, our products allow vehicles to gain rapid access to the worst affected areas, to allow aid materials and evacuation teams to access areas that would otherwise be inaccessible.

With a proven track record for use in the harshest environments by the world's most demanding customers, TRACKWAY is in a class of its own.

Flying Penguin Enterprises Ltd (FPE) specialises in the provision of a vast array of high quality spare parts to support virtually any motor vehicle in use today. FPE can supply spare parts, oils, lubricants, batteries and other consumables to support any vehicle UN organs or missions are likely to encounter irrespective of how unusual the requirement. FPE has supplied parts for specialised applications such as mine clearance or vehicles armoured to deliver ballistic or blast protection. FPE is also able to offer its clients a range of consultancy services particularly Fleet Management and Workshop Management.

FPE has done a lot of work with UN missions and organs both on a voluntary and consultancy basis and has also worked closely with the Department for International Development (DFID) to assist DFID's efforts to effectivize humanitarian management. FPE also works closely with the Fleet Forum (www.fleetforum.org): an organisation dedicated to the promotion of best practice in humanitarian fleet management. FPE is proud to support Fleet Forum's efforts and see this as part of our corporate social responsibility agenda.

FPE aspires to be an ethical and professional supplier and holds ISO 9001 (Quality) and ISO 14001 (Environment) Accreditations and is proud to serve a number of UN organs and missions as well as a range of NGOs.

Freeplay Energy are the original inventors of the wind-up radio which was used to halt the spread of AIDS in Africa.

Today, Freeplay Energy produces a range of products which generate energy and light, enable communications and promote the development of local economies by utilising innovative solar and dynamo technology. All of our radios, including the Encore MP3 Player, and many of our lighting products incorporate dedicated or emergency mobile phone charging.

Our wind-up and solar powered products offer measurable social and environmental benefits for global community programs. Using clean, safe, sustainable free energy, Freeplay's products give universal access to light, information and communication, encouraging sustainable development, supporting social change and empowering citizens. At the same time, the products help reduce energy consumption and minimise environmental impact.

Freeplay's wind-up and solar powered radios have been shown to have a significant, positive effect on community development and the empowerment of individuals, particularly within Africa and Asia. By providing access to information about health and agricultural best practice, civil security and emergency preparedness, and by facilitating communication and the sharing of experiences within and between communities, Freeplay radios continue to play an important role in enabling citizens to break the poverty cycle and build a successful, productive and sustainable future.

GMK Ltd are a leading supplier of firearms, ammunition and related products into the UK Ministry of Defence and Law Enforcement Authorities. We are part of the Beretta Group, recognised as one of the foremost suppliers of firearms into the worldwide Defence / Law Enforcement communities. Beretta have created a specialised unit called Beretta Defence Technologies (BDT) to market their Group Defence / Law Enforcement products including Sako/Tikka rifles, Benelli shotguns, Steiner Optics / Steiner-e-optics laser aiming and illuminating devices. The Benelli range includes the L128A1 Combat Shotgun, which GMK have supplied to the UK Ministry of Defence in support of the British Armed Forces in theatres of Operation Worldwide.

GMK originally entered the Defence / Law Enforcement market through the supply of Federal/Speer Ammunition. Our expertise in bulk ammunition supply now extends to sourcing supply from numerous international brands to ensure we always have alternatives when urgent supply is required.

We service the market through a dedicated Defence / Law Enforcement team within the company, focussed solely on the Public Sector (Law Enforcement / Ministry of Defence). By building our reputation on outstanding customer service, GMK are now the leading supplier of operational and training ammunition into the UK Police, as well as suppliers of specialist ammunition to the UK MOD.

Our ammunition range is complimented by pyrotechnic products from Centanex a UK based specialist manufacturer. The range encompasses; '6' Bang and 'Single' Bang distraction devices, screening smoke, thunderflashes and maroons. GMK offer a comprehensive range of ancillary products in support of our core firearms and ammunition lines, all sourced from high quality international companies. We also have a high degree of success in sourcing products and the provision of bespoke customer solutions.

When GMK entered the MOD/LE market, ten years ago, we brought with us our guiding principles from the commercial market; to supply the best product available, keep it in stock and offer excellent customer service. These three ideals have proved successful in establishing GMK as a respected and reliable partner.

Sector(s): Business (and Consumer) Services, Education and Training, Financial Services

Are you registered on UNGM: Yes

IASeminars is an independent global financial training company specializing in international accounting seminars (IFRS & US GAAP & IPSAS) and other financial training events.

Originally founded in the UK in 2002 to offer training to European companies planning for their 2005 transition to International Financial Reporting Standards (IFRS), IASeminars has since expanded to become a successful worldwide operation with a comprehensive range of courses being offered in 4 different languages on 5 continents - as well as online.

IASeminars training is available via three channels:

- Public Courses
- In-house Training
- Online eLearning

Since we started, over 17,000 people from some 140 different countries have attended our events.

Our client list includes many of the world's leading companies, corporations and government agencies.

A large number of our clients return for further training and also recommend IASeminars to their colleagues and friends. Half of our business comes from people and organisations that we already know and have served in the past. We can therefore demonstrate very high levels of student and client satisfaction.

Our courses are taught not by general trainers, but by subject specialists acknowledged as experts in their fields. Our training is relevant, effective and competitively priced.

With high quality training comes a high level of service and support. Our clients are served by an experienced, friendly and professional Customer Services Team, who are available to answer questions and help with further information. They will be pleased to assist with selecting the appropriate courses for your unique training needs, and to support our clients through registration, course attendance and beyond.

India IMPEX (UK) Ltd

Contact: Mr Divyesh Thakkar / Mr Sagar Mehta

Telephone Number: +44 7960263946/ + 91 2267362801

Contact Email: divyesh@sunlite-solar.com / sagar@sunlite-solar.com

Sector(s): Education and Training, Energy/Power, Environment and Water, Healthcare and Medical, Retail, Humanitarian Aid and Disaster relief

UNSPSC Code(s): 39000000, 39100000, 39110000, 39111500, 39111700, 39112000, 39120000, 49121500, 52160000, 77101700, 77111500

Registered on UNGM: Yes

India Impex is an Indo-British partnership with a manufacturing base in Gujarat -India. The business is built around a strong CSR ethos to give access to light and mobile phone communication using innovative solar products that will address the needs of the poorest and deprived communities globally as part of the UN's MGS's.

The latest UN statistics show that there are currently some 43 million uprooted victims of conflict and persecution worldwide, of which 15 million are refugees and 27million IDP'S... and growing.

India Impex through its LTA partnership agreements with several International Aid and Humanitarian Organisations has a successful 5 year track record of supplying an innovative award winning portable 'SUNLITE' Solar lanterns as a core relief item for various Humanitarian, refugee resettlement, emergency, education, gender empowerment, disaster and resettlement programs globally.

The benefits of using a solar lantern as opposed to a Kerosene one through a uniquely developed business distribution model and a bespoke awareness and training program has enabled us to 'empower the lives' of over one million people at the bottom of the social pyramid to date. It has also contributed to the reduction of carbon emissions in the environment.

As a social business enterprise, we are always looking to build and develop new partnerships on a scalable level, so as to benefit all sectors of society.

Its applications have extended to various bespoke programs too, such as poverty reduction, protection against child and gender abuse, poverty alleviation, women empowerment, environmental awareness, children's well-being and education programs and communication access for rural communities to enhance social cohesion.

For further details please visit www.sunlite-solar.com and our Facebook page - Sunlite Solar - India Impex

UNSPSC Code(s): 43230000, 43231500, 43231600, 43232400, 43232600, 71160000, 80101600

Registered on UNGM: Yes

IRIS Intelligence is a world leader in the field of Enterprise and Project Risk Management

Our Risk Management system helps organizations to implement best practice processes, enabling customers to reduce their exposure to risk, either by reducing the probability of unforeseen events or by minimizing the impact of such an event should it occur.

Implementing strong risk management techniques such as these has been shown to significantly enhance the ability of organizations to deliver products and programs on time, whilst reducing the overall costs of project delivery by an average of 18% (Source: Project Management Institute). Identifying and mitigating a single risk almost invariably pays for the costs of any risk management activity many times over.

IRIS also produces a unique software tool to increase innovation and creativity.

All IRIS products are user friendly systems that can be accessed via the web or in areas where internet access is not available. Multi-lingual versions are available for most products

The IRIS system has been exported extensively. Clients include NASA, the Homes & Communities Agency, the US Geological Survey and Odebrecht Brazil to name but a few. The system is also used in more remote locations such as Ghana, Nigeria and the Dominican Republic.

M&C SAATCHI WORLD SERVICES is a specialist division of M&C Saatchi, the world largest independent communications network, providing social and behavioural change to the development sector.

Our aim is to harness the power of brilliant creative thinking and best in class marketing and communications to help solve some of humanity's most challenging and important issues, in fragile, post conflict affected states, developing and emerging markets.

Our strategy team all have specialist knowledge of the sector and understand how to apply the very latest in behaviour change thinking, including social norm theory.

However, we also believe that many of the principles and rigorous processes underpinning effective commercial and public sector campaigns remain relevant.

Our clients include Nike Foundation, UNICEF, DFID, the United Nations Foundation and the Bill & Melinda Gates Foundation. Recent work ranges from creating the Action / 2015 brand for the post-2015 development goals to assisting DFID Ghana on the scoping of a project designed to prevent violence to girls.

Website: www.metransens.com/security

Sector(s): Defence and Security

Registered on UNGM: Registration in process

At Metrasens, we're experts in detection. Superior technology designed to address your specific needs, combined with expertise gained from successful deployments around the globe. Before founding Metrasens in 2008, our team of award-winning PhD. physicists led the development of the world's leading military systems for submarine and humanitarian land-mine detection. Now, the benefits of their expertise extends around the globe, filling the gaps in the capabilities of existing search technologies.

Metrasens' Cellsense® detectors lead the world in ferromagnetic detection. Uniquely sensitive to essential components in today's low-metal-content cell phones and also more effective in finding small blades and other ferrous contraband than conventional metal detectors. Unlike conventional metal detector technologies, Cellsense is unaffected by stationary metal such as steel reinforced concrete walls or floors, and the typical sources of "false" alarms such as non-ferrous jewellery and aluminium containers. Unlike conventional metal detectors, our products are entirely passive and since they do not radiate a signal they present no health and safety concerns for scanned subjects or operators. Our products have overt and covert screening options, they are easy to use, have simple controls, require no calibration and are designed to provide flexibility and rapid deployment in a wide range of locations, including prisons, courtrooms and other law enforcement facilities, government buildings and high security commercial environments.

Cellsense detects ALL cell phones, turned on or off, located on or inside the body. Deployed in less than 30 seconds, Cellsense can perform a full body search on up to 40 individuals per minute. Freestanding or wall-mounted options available, long battery life or A/C power.

Millers Oils Ltd

Contact: Charlie Forecast

Telephone Number: +44 1484 475080

Company Profile: Permali is a privately owned company, established in 1937, which designs, specifies, tests, manufactures and integrates a wide range of passive ballistic, fragmentation and blast composite armour solutions, to counter a range of threat levels, for land, air and naval platforms. Permali's bespoke protection solutions are designed and supplied for both new build vehicles and upgrade solutions, and include appliqué armour, internal spill liners, moulded structures for blast protection, composite floor panels as well as thermal and acoustic insulation panels.

Permali's in-house manufacturing capabilities include impregnation of various fabrics, press laminating of flat panels (including high pressure pressing), composite moulding, CNC machining, waterjet cutting and Tufshield® polyurea spray coating. All of these capabilities are provided under one roof, together with extensive in house design, test and R&D capabilities.

Police Scotland College - Tulliallan

Contact: Gordon Thomson

Telephone Number: + 44 (0) 1259 732026

Contact Email: PoliceScotlandInternational@scotland.pnn.police.uk

Police Scotland is responsible for policing across the length and breadth of Scotland, some 28,168 square miles. Police Scotland is the second largest police service in the UK after the Metropolitan Police. Our focus is on Keeping People Safe which is at the heart of everything that we do.

The Police Scotland College, Tulliallan, is the training arm of Police Scotland. This 650 bed residential facility is unique amongst police training establishments worldwide as it is responsible for training every police officer in Scotland from new recruits to the service through to hosting events for chief officers attending strategic level command courses. A unique feature of the Police Scotland College is that it operates at the interface with the education sector and is able to design, deliver and award academic credit to new qualifications, with the credit being recognised by universities and other institutions across the world. As part of our commitment to international policing the Police Scotland College has worked with the Scottish Qualifications Authority to create accredited international policing qualifications which we have delivered in several countries. New international programmes are continually being developed.

We are totally committed to providing the best quality training, leadership and development opportunities for police officers and as an outward looking organisation we keen to share our experiences and expertise with police and law enforcement around the world. Having worked in several countries we have amassed experience of what works and what doesn't work and as a result we always ensure that any engagement we have adds value and keeps people safe in their local communities, wherever they may be.

For the last 20 years, since our inception, we have been delivering unique and highly professional procurement and purchasing services to our clients. The dedication we have for our customers, coupled with our in-depth understanding of the markets in which we operate, is second-to-none.

One of the reasons why we remain at the forefront of the procurement sector is our refusal to lose sight of our company philosophy, that whatever your request - no matter how complex or demanding 'we get it'. We endeavour to garner a comprehensive understanding of your individual needs in order to ensure we help you get the job done on time and on budget. Our trading house and procurement department are extensions of your team and see our priority function being to keep your wheels firmly in motion through our extensive experience, technological capabilities and the efficiency of our procurement, purchasing and supply chain processes - be they individual requests or full outsourced procurement and supply chain projects. Reliability, resourcefulness and flexibility are among our key values. It is these values, which we have held strong for the past two decades and continue to do so into the future, which makes us the procurement company of choice among some of the world's most notable and successful companies. Unrivalled in customer dedication and understanding of the industry, some of the biggest names in the oil and gas industry, international aid and infrastructure, rely on us, often as their sole supplier, to deliver their procurement needs.

Ultimately, our successful delivery of projects, sustainable and ethical business principles and innate understanding of our customers' requirements, has helped to improve the outputs and business performances of our customers - the precise results we seek to achieve.

We pride ourselves on our global breadth of knowledge and micro logistical skills and we relish the opportunity to embrace your challenge.

Registered on UNGM: Yes

The Explosives Engineering Services has a comprehensive grounding in all aspects of ERW and explosives clearance and risk assessment, with experience operating both in the UK and globally. All relevant personnel are members of the Institute of Explosives Engineers and furthermore RPS EES supports clients by addressing both liabilities and health and safety requirements associated with detection, clearance and remediation of areas with explosive ordnance and / or Land mine legacies. The service offered by RPS EES is unique in the fact that we are a fully independent ERW Consultancy with no commercial links to any clearance contractor. That said we do maintain a very good working relationship with all major clearance contractors throughout the globe. As an independent consultant we feel we are able to offer our clients truly unbiased advice on the true risk presented by ERW and have no vested interest in securing follow on clearance contracts, in fact our aim is to work as the clients subject matter expert and ensure that any clearance operation is not only cost effective but conforms to the clients requirements to allow safe passage during operations without the need for undue clearance.

RPS EES has extensive experience within both commercial and Humanitarian Mine Action. The EES specialise in the general assessment, needs analysis, project management, Mines \ UXO awareness and QA\QC of contaminated land accompanied with experience in actual Landmine \ UXO clearance and indigenous capacity training projects globally. Adhering to International Mine Action Standards governed by the United Nations, the team is also extensively involved in advising on the development of accreditation and best working practises guidelines and standards for ERW contractors.

RPS EES have Standard Operating Procedures including clearance of Mines \ UXO and an extensive QA\QC SOPs, which are reviewed on both an operational project and annual basis and changes promulgated by IMAS, in country standards or as a result of Boards of Enquiries.

UNSPSC Code(s): 39120000, 41100000, 41111808, 41111903, 44100000, 46151608, 46170000, 46171600, 46200000, 86101709, 92120000

Registered on UNGM: Yes

Scanna MSC is a leading British manufacturer specialising in compact and portable security screening equipment. Applications include postal security, suspect package/bag screening and weapons detection.

Our main product lines include:

Postal Scanners:

Scanmax is our best selling range of high definition cabinet x-ray postal scanning units. **Scanmax** produces high clarity x-ray images of all types of postal threats. **Scanmax** can also be used in reception areas to x-ray visitors handbags and briefcases. Scanmax is ideal for confined spaces with a footprint no larger than a 4 drawer filing cabinet.

Our smaller **Scanmail 10K** is a slide through electronic mailscanner that will automatically indicate the presence of detonators or batteries in a postal Improvised Explosive Device. It is ready to use straight from the box and requires no specialist operator training.

Portable X-ray Systems:

Our portable x-ray systems can be used for a range of applications, including unattended object inspection, Counter-IED and search, weapons intelligence, forensics and mine clearance. All our portable x-ray models are reliable and robust, and have been designed for operation in the most testing and challenging environments.

We offer both portable DR (direct radiography) x-ray systems where images are transmitted directly from the x-ray imager within seconds to a laptop via cable or wifi, as well as CR (computed radiography) x-ray systems which use very thin flexible digital x-ray plates allowing greater accessibility into confined areas, and for using in multiples to inspect large objects, vehicles and walls.

Our **Scanview** x-ray software works almost identically across the entire range of Scanna x-ray systems which ensures conformity across fleets of units and reduces training requirements for equipment upgrades.

Scanna products are built to ISO9001 standards and used by government, military, police, customs and prison authorities and global organisations, including UN, in over 100 countries worldwide.

Contact Email: info@sonic-comms.com

Website: www.sonic-comms.com

Sector(s): Communications, Education and Training, Surveillance, Covert & Overt Vehicle Installations

Sonic Communications (Int) Ltd is a market leader & global supplier of specialist equipment, solutions & services, for the Police, Military, Government & Industrial sectors, with over 35 years' experience in these fields. Sonic Communications specialises in the design & manufacture of a large range of communications accessories for all makes & models of radio equipment. Our forward viewing design & innovation team & experienced production staff strive to produce industry leading solutions to all communications needs, be they overt, covert, bodyworn or vehicle installed.

Our close association with Law Enforcement & Counter Terror agencies has led the development of bodyworn, mobile & static video surveillance equipment & the installation of all types of technical equipment into vehicles, both covertly & overtly, either in the UK, at our fully equipped installation workshop, or at the customer's premises. Sonic leads the way in the full integration of remote control & viewing systems over multiple transmission means. This facilitates rapid dissemination of surveillance output for wider situational awareness & timely decision making.

Sonics Training Department utilises experienced practitioners with Law Enforcement or Military backgrounds to provide a comprehensive training capability, which covers a wide area of training needs that can be tailored to your specific requirements & delivered either in the UK or in-Country.

Design, manufacturing & worldwide technical support is provided from our ISO9001:2008 accredited Headquarters based in the UK, from which our International sales team operate, providing direct sales support to our Worldwide Customer base & to our trusted partners.

Sector(s): Communications

Registered on UNGM: Yes

Spectra Group (UK) Ltd is a leading international provider to Defence & Security, Aid & Emergency and Commercial organisations of secure voice, data and satellite communications in locations with limited or compromised infrastructure.

Spectra provides rapidly deployable voice and data services across multiple bearers. Satellite, Leased Line, GPRS, 3G and 4G, WIFI or ADSL bearers can all be utilised, depending on requirement. Spectra SlingShot® is a small and lightweight unit that attaches to existing radios, enabling users to maintain real-time Beyond Line of Sight (BLOS) communications in all situations and locations. It is currently available with both UHF and VHF capacity, for military and civilian use, with manpack, vehicle-mounted and maritime and aviation options.

Slingshot® offers a straightforward and cost-effective way to achieve global, secure, communications for those using in-service radios with national, multi-national and inter-departmental cryptographic security, relieving demand on scarce and expensive UHF TACSat channels.

Spectra Hostile Area Deployable Environment (SHADE™) provides connectivity to the World Wide Web, ISDN, X.21, PSTN or dedicated private networks. A choice of SHADE™ Lite & ↔SHADE™ gives the system flexible scalability, making it the perfect hostile environment telecommunications platform for small, medium and large teams. Deployed SHADE™ nodes use any available bearer to link into the network to create a global communications capability backed up by a 24/7/365 Network Operations Centre which provides remote configuration, monitoring, helpdesk support and fault resolution to all deployed assets.

Registered on UNGM: Yes

Spectrum Healthcare UK Ltd specialises in the supply of evacuation equipment and moving and handling equipment for use in hospitals, care homes, hospices, schools and any other public or private building which would require evacuation equipment in the event of a fire or similar emergency. Our innovative products are designed with the safety of individuals or residents in mind, as

well as the postural comfort of the carer.

We work with healthcare professionals and organisations to develop evacuation products to cater for all types of individuals, including patients with specialist or complex care needs. Many of our products can be modified. If, for example, you are looking for evacuation equipment for young children we can produce smaller versions or increase the padding for people with conditions such as brittle bones.

Our most well-known products are the Ski Pad, Ski Sled, AlbacMat and ResQmat designed for use in confined areas, where space is limited, such as congested hospital wards and buildings with narrow corridors or single width fire doors.

Recent additions to our existing range, include our latest innovations the Bariatric Evacmat, designed for the safe evacuation of large individuals in the event of a fire or similar emergency and the EMS Bariatric EvacMat designed especially for use by the emergency services, for the safe movement, rescue or evacuation of large individuals.

These products are quite different to most other evacuation devices, in the marketplace, such as chairs, conventional stretchers etc, as they tend to minimise the manual handling problems associated with the conventional methods used.

Our range of moving and handling equipment include the ErgoKneeler™, Jolly Back Chair and OneLeg, three ergonomic designs which can provide comfort, support and ease of movement for people such as nurses, midwives, podiatrists, therapists, teachers and care workers who undertake tasks at low levels.

SCS is an independent consultancy company that specialises in analytical and technical projects/programmes, as well as the delivery of operational and training support. Established in 1992, SCS is now part of Cohort plc. It has a track record of implementing successful in-theatre service arrangements by providing: analysis based on operational research; technical advice; and the generation of solutions to complex and challenging situations. The company specialises in: project and programme management; delivery of modern technical solutions that involve both software and hardware; and business transformation support. SCS' capability spans the spectrum from strategic analysis to front-line operational support.

Training is a key enabling component of operational capability and it plays an important role in maximising operational effectiveness and the preparedness of people, equipment and organisations. SCS offers a service that is guaranteed to be independent, confidential and customer-focused. We currently offer a broad range of training consultancy and support services to the civil authorities, the commercial sector and Defence, and we are able to define, develop, deliver and review training at all levels. We have specific skills in: exercise support; scenario and vignette writing; situational planning; use-case definition; learning and development solutions; resilience; and force protection.

SCS has consultants with extensive logistic skills, based upon detailed practical experience; this includes the development and management of information systems and their underpinning processes. We are experienced in the delivery of logistic support and sustainability, both to military and UN operations; our ILS skills includes equipment and logistic support at the strategic, operational and tactical levels.

SCS has well-established Communications and Networks capabilities, with consultants who provide support and advice across a broad spectrum of development and delivery activity. Our people offer deep practical knowledge and experience in risk management, configuration management, systems integration, system security and disaster recovery. SCS is currently active across the UK and in NATO, the EU and the Middle East. SCS is now seeking to apply its extensive consultancy capabilities to support UN Agencies.

Systems Engineering & Assessment (SEA) is a specialised engineering services company. We offer highly capable engineering services from systems engineering, communications, sonar, electronic warfare, human factors, bespoke IT, transport, simulation and training. We offer systems integration, design and manufacture as well as advice and assessment of technical solutions. SEA operates in the research, Naval systems, communication and transport markets providing specialist knowledge along with detailed engineering expertise. Our products include deployable cellular comms and large integrated communication solutions as well as traffic enforcement/management solutions. SEA has about 350 staff and office in the United Kingdom.

Tensar International

Contact: Tim Oliver

Telephone Number: +44 1254266814

Contact Email: toliver@tensar.co.uk

Website: www.tensarinternational.com

Sector(s): Construction, Mining, Oil & Gas. Energy/Power, Environment and Water
Registered on UNGM: No

Tensar International provides site solutions for construction ground works problems. We have geogrid products and systems for gaining access over soft and variable soils, road rehabilitation, rapid repair of failed slopes and landslips, construction of temporary and permanent bridge abutments and earth retaining walls. These Tensar systems incorporate Tensar geogrids to stabilize or reinforce soils. In most cases this allows the use of locally available aggregate or fill materials. In addition, Tensar has a range of Marine Mattresses that can be either fabricated on site or supplied in a prefabricated lay flat format ready for filling on site with local stone. These mattresses are used for shoreline protection or scour protection in waterways. Tensar also manufactures rolled erosion control products for the retention of topsoil on slopes and to enable the establishment of vegetation on river banks. Tensar provides on-site assessment, design and supply solutions, and design software and training for each of its systems.

LTC provides cutting edge and validated language technology and multilingual services, including translation, localisation and terminology management. Our services accelerate time to market, create new global revenue opportunities, expand worldwide brands and drastically reduce operational costs.

LTC's flexible and focussed approach to ensuring our customers' success is valued by leading global enterprises and governmental and non-governmental agencies around the world, including Deutsche Post and the European Union.

LTC develops and sells a range of software products including LTC Worx, a business information system for multilingual process automation, as well as LTC Communicator, a multilingual translation workflow automation tool and the web-based knowledge management system LTC Organik.

The Sure Chill Company

Contact: Laura Clarke
Telephone Number: +44 1654 712713
Contact Email: laura.clarke@surechill.com
Company Email: hello@surechill.com
UNSPSC Code(s): 24131500, 41103010, 41103011
Registered on UNGM: Yes

The Sure Chill Company is behind a unique refrigeration technology with the power to impact people around the world. At its heart is its ability to operate without power for 10 days or more.

The technology is currently available in Sure Chill Vaccine and Blood Bank refrigerators that can have exceptional performance characteristics due to the technology that works like no other refrigerator. These refrigerators can be solar powered or mains powered and don't rely on a constant power source or a battery. Sure Chill keeps cabinet temperatures between 4°C and 5°C and limits temperature variation within the cabinet to less than 1°C. They guarantee never to freeze vaccines or other vital supplies. The Mains powered model guarantees to keep vaccines safe in the absence of any power supply for more than 10 days at a constant 43°C ambient. Solar direct drive model provides guaranteed cooling for more than 7 days without power at 43°C ambient. Whilst the Mains version requires an average of less than 4 hours electricity per day at 43°C and just 2+ hours at 32°C.

Sure Chill vaccine refrigerators are safeguarding vaccines and saving lives in many countries across the world, including Mali,

DR Congo, Zimbabwe, Sierra Leone, Ethiopia, Chad, Haiti, Senegal, Vietnam, Zimbabwe, Zambia, Ondo State Nigeria, and South Sudan.

Please contact us directly to find out more.

Titania Ltd

Contact: Ruth Inglis

Telephone Number: 01905 888785

Contact Email: ruth.inglis@titania.com

Website: www.titania.com

Sector(s): Defence and Security, ICT

Titania is a network security software company which has grown rapidly and now supplies software to over 60 countries. Our multi-award winning software Nipper Studio and Paws Studio automates the network security and compliance audit reporting processes, and offers substantial savings by producing a detailed report in seconds that could take weeks to achieve manually.

Used by the FBI, DoD, NSA and across 50 countries, Nipper Studio provides a fast and cost effective way to securely audit over 100 different types of network device. Much more detailed than a scanner, the reports enable you to maintain a higher level of network security between penetration tests.

Paws Studio is a compliance auditing tool for your workstations and servers which supports both Linux and Windows machines. You can produce compliance reports in seconds using either the pre-defined policies (NSA, PCI, STIG, SANS, NERC, OVAL) or your own customized compliance policy.

Registered on UNGM: Yes

The Toye Group is a well-established British Company with a pedigree that stretches back over 300 years which specialises in the manufacture of medals, state insignia, fabric weaving and uniform accoutrements. For many decades we have been proudly supplying Her Majesty the Queen and as such are Royal Warrant holders for the supply of insignia, gold and silver lace, and embroidery. The Toye Group are also the UK's specialist manufacturers of uniform accoutrements and peaked caps and headwear, supplying the Armed Forces, police and civilian services.

The Group has two factories in the UK. One in Birmingham's Jewellery Quarter that specialises in metal products and the other at Bedworth, which concentrates on fabric.

In Birmingham, we have the capability of covering every stage in the manufacture of a metal product from initial concept and design to tool and die making, stamping or casting, enamelling, polishing and plating. Products include State insignia, medals, badges and buttons, and commemorative plaques.

The Bedworth factory specialises in narrow fabric weaving, manufacturing gold braids, coloured ribbons, laces for the military and emergency service associations worldwide. Bedworth also has particular expertise in hand and machine embroidery, and making crafted epaulettes, caps, berets and hats.

The company takes great pride in its training and quality control and as such is a member of the British Narrow Fabrics Association, a Member of the Birmingham Chamber of Commerce, and is ISO 9001 accredited. Bringing together top quality UK suppliers of ceremonial and working uniforms the Group project manage turn-key solutions for the supply of uniforms from design, sizing, production, warehousing to distribution.

Mega projects are more closely scrutinized today than ever before. To chart a path to success, companies must employ sound methodologies that guide decision making from project start to finish. 80% of PWC respondents said that their projects had experienced a delay, with 46% saying that they had suffered significant delays - in excess of six months. EY reported that cost overruns in the oil & gas sector alone will exceed \$500 billion. Grant Thornton surveys of major projects consistently demonstrate that two out of three projects run over time, 50% are over budget, and one in three do not deliver their stated business benefits.

I have spent the last 5 years working with some of the UK's top universities and academics to develop an innovative training programme that will show your senior executives how to minimise risk and resulting cost-overruns. Corporate reputations are protected, efficiency improves and major capital losses are reduced. That's what I do.

Please allow me to introduce my award winning research completed at the Liverpool John Moores University (ljmu.ac.uk) into the phenomena of cost blowouts with mega and major heavy engineering projects.

Repackaged by the Infolab21 at Lancaster University as an innovative 12 session interactive training programme is for senior management, this intensive programme is designed to combine the benefits of on-demand delivery with group learning and small group activities, (18 persons for 6 x 3 person small groups). Or choose the Wingman option for onsite support. I am currently working with the UK Nuclear Decommissioning Authority (NDA) to introduce this training programme into the nuclear decommissioning supply chain. Also I am creating a group of University Professors and Specialists from the UK, Europe and the Americas on a major new EU research initiative into the the procurement and delivery of nuclear decommissioning programmes.

Please visit the Platform or LinkedIn pages for brochures and Test Drive Sampler or send me an email. <http://triumphvipprojects.co.uk/moodle/>

Established in 1796 as a 'place of useful learning', the University of Strathclyde is now a leading international technological university, providing outstanding research capacity to industrial and institutional partners. We are committed to working with small and large organisations to help tackle global challenges in areas such as energy, health, education, and water and sanitation. We work in partnership with governments and higher education institutions in emerging economies to develop local capacity in policy development and implementation. Our academic teams also provide technical advisory support for a range of international consultancies and industrial partners.

We have the largest university electrical power engineering and energy research grouping in Europe. We delivered the Malawi Renewable Energy Acceleration Programme for Scottish Government, supporting policy development for community energy systems and wind-power capacity evaluation in Malawi.

Health Technologies at Strathclyde provides access to globally leading expertise in drug discovery, medical devices, diagnostics and health interventions. The Centre for Biophotonics fosters world-class interdisciplinary research between physicists and biomedical scientists in the area of advanced optical imaging.

About Vemotion: Vemotion are specialists in the transmission of live, secure video over wired and wireless networks including low bitrate GPRS, 3G and 4G systems. Vemotion's technology allows video to be transmitted cost-effectively from a wide range of remote and mobile (body-worn and vehicle-borne) locations back to a central control facility which distributes it to the appropriate expert. Products include software and hardware codecs, fully integrated deployable cameras, ruggedized deployment units, body-worn transmitters and video servers.

Vemotion encoders are designed for various overt and covert scenarios. From the ultra-portable VB-10 Smartphone encoder App, with a remote camera capability, to the fully integrated, small form factor VB-20 encoder and DVR unit, suitable for overt and covert surveillance and body worn applications. The VB-30/35 multi-channel output encoder units suit general purpose and rugged applications, and the high capacity video encoder VB-40 offers up to 8 simultaneous outputs. Both IP and Analogue cameras are supported. Vemotion operate in the Defence and Homeland security markets so our credentials for integrity and security are inherent in the products. Each input is authenticated by license key and the unique identity of the hardware seeking connection to the server, before the connection is accepted. The Vemotion Server options provide a fully 24/7 service capability across more than one remote secure data centre, with real-time data replication providing automated switching from primary to secondary servers. Vemotion self-healing capabilities will ensure the input and output streams (subject to authentication) seek reconnection as soon as possible. Each viewer has its own identity key too and the identity of the device is recorded in the server. Transmissions are over Secure Socket Layer (SSL) using AES 256 encryption and Certificate Authentication. For more information or to arrange a demonstration please visit our website at www.vemotion.com or contact us on 01845 521112 or email us at info@vemotion.com

The Vestey Group was formed in 1897 and comprises 9 food companies specialising in the import, storage and distribution of a wide variety of food products from global suppliers into the various local market places in which we operate. The Group principally trade: beef, pork, lamb, poultry, game, fish, seafood, wine, ambient feeding solutions, convenience and foodservice products into some 70 countries. The Vestey Group combines longstanding traditions within the 117-year old Vestey family business with a dynamic, customer-focused approach of all of its management teams. Vestey Foods UK Ltd, which is part of the Vestey Group, supply ambient feeding solutions to the British, Dutch, Norwegian, Danish and Malta Armed Forces, and other Government Departments and Non-Governmental Organisations globally. We also provide ambient self-heating meals to Emergency Services (Police, and Fire and Rescue Services) across the United Kingdom.

Our Product Range

- Individual and group ambient feeding solutions (single meals, 8/12/24 hour packs or 10 people for one day).
- Western, halal, vegetarian and kosher varieties.
- Food heating solutions.

Our Unique Selling Points

- A 2 year product shelf-life on delivery.
- A vast range of ambient main meals, desserts, snacks and drinks, and heating solutions.
- World leading quality assurance processes.
- Our strong reputation in supplying ambient feeding solutions.
- Our outstanding levels of customer service.
- Our clear understanding of our customers requirements.

Our Key Message

We are a world leading supplier of ambient feeding solutions to Government and Non-Governmental Organisations, and the Emergency, Humanitarian and Retail sectors.

Vivomed Ltd

Contact: Chris Webb

Telephone Number: +44 (0) 28 4461 7666

Contact Email: Chris@Vivomed.com

Website: www.Vivomed.com

Sector(s): Pharmaceuticals, Healthcare and Medical

Vivomed is a family run sports medicine supply company founded in 2000 by Pharmacist Ronnie Lennon.

We pride ourselves on our high levels of service, range of products and value for money.

At Vivomed we have a team of medically qualified professionals, enabling us to augment the efficient supply of first-aid, physiotherapy and medical equipment with help and advice when needed.

We believe Vivomed is the only sports medicine supply company in the market that has an on-site pharmacy and qualified pharmacists on hand to supervise all drug related orders.

Sector(s): Advanced Engineering, Defence and Security

WFEL is an established world leader in tactical military bridging, supplying over 40 armed forces worldwide for over four decades. Our expertise - built on a century of engineering excellence and innovation - includes concept design, prototype manufacture, full-scale production and after-sales support of a range of rapidly-deployable, modern bridging systems for use in both military and disaster-relief scenarios. We are a prime contractor to the UK Ministry of Defence and the U.S. Department of Defense and operate a global sales network, working directly with international governments and Non-Governmental Organisations.

Dry Support Bridge (DSB)

Just eight soldiers and single launch vehicle can get traffic moving over a 46-metre gap in less than 90 minutes using the Dry Support Bridge (DSB). The DSB is the leading rapidly-deployable tactical military bridge in the world, both in military and disaster relief operations. With an MLC 120 rating, the DSB is currently in service with the US, Swiss and Turkish Armies.

Medium Girder Bridge (MGB)

The Medium Girder Bridge is a classic example of high-quality precision engineering that has stood the test of time. The MGB, held by 40 armed forces worldwide, is made from lightweight-alloy, and its modular build meets the evolving needs for bridging equipment. Highly transportable, rapidly-deployed, adaptable and cost-effective, the MGB is ideal for a wide range of military and emergency relief situations.

Air Portable Ferry Bridge (APFB)

The Air Portable Ferry Bridge (APFB) is a modular system that can be transported rapidly and easily by land, sea and air and can be built by troops or trained civilians in military or civil emergency applications. Despite its light weight and portability, the APFB has a military load classification of MLC 35. It can be used to bridge both wet and dry gaps, employed as an over-bridge and incorporates a ferry system.
